THE
CAMPER
COMPANY

PROOF OF TRUST. PROVEN CAPABILITY. EXCEPTIONAL FINISH.

THE ASPIRATION

Beyond Where The Map Ends.

Capable enough to go further.
Comfortable enough to stay longer.

Some places are worth being hard
to reach. This is what makes staying
in them easy.

THE PROCESS

Yours, Before It Is Built

*Built around how you travel, not around
what is easiest to offer.*

Layout, finish and equipment, arrived at
together, inside a process proven enough to
trust and open enough to be entirely yours.

FUNCTIONAL EQUIPMENT

What You Never Have To Think About

*Every system earns its place twice:
once in the workshop, and again,
every time you forget it is even there.*

THE REWARD

For Those Who Have Earned The Distance

Chosen once. Enjoyed every time after.

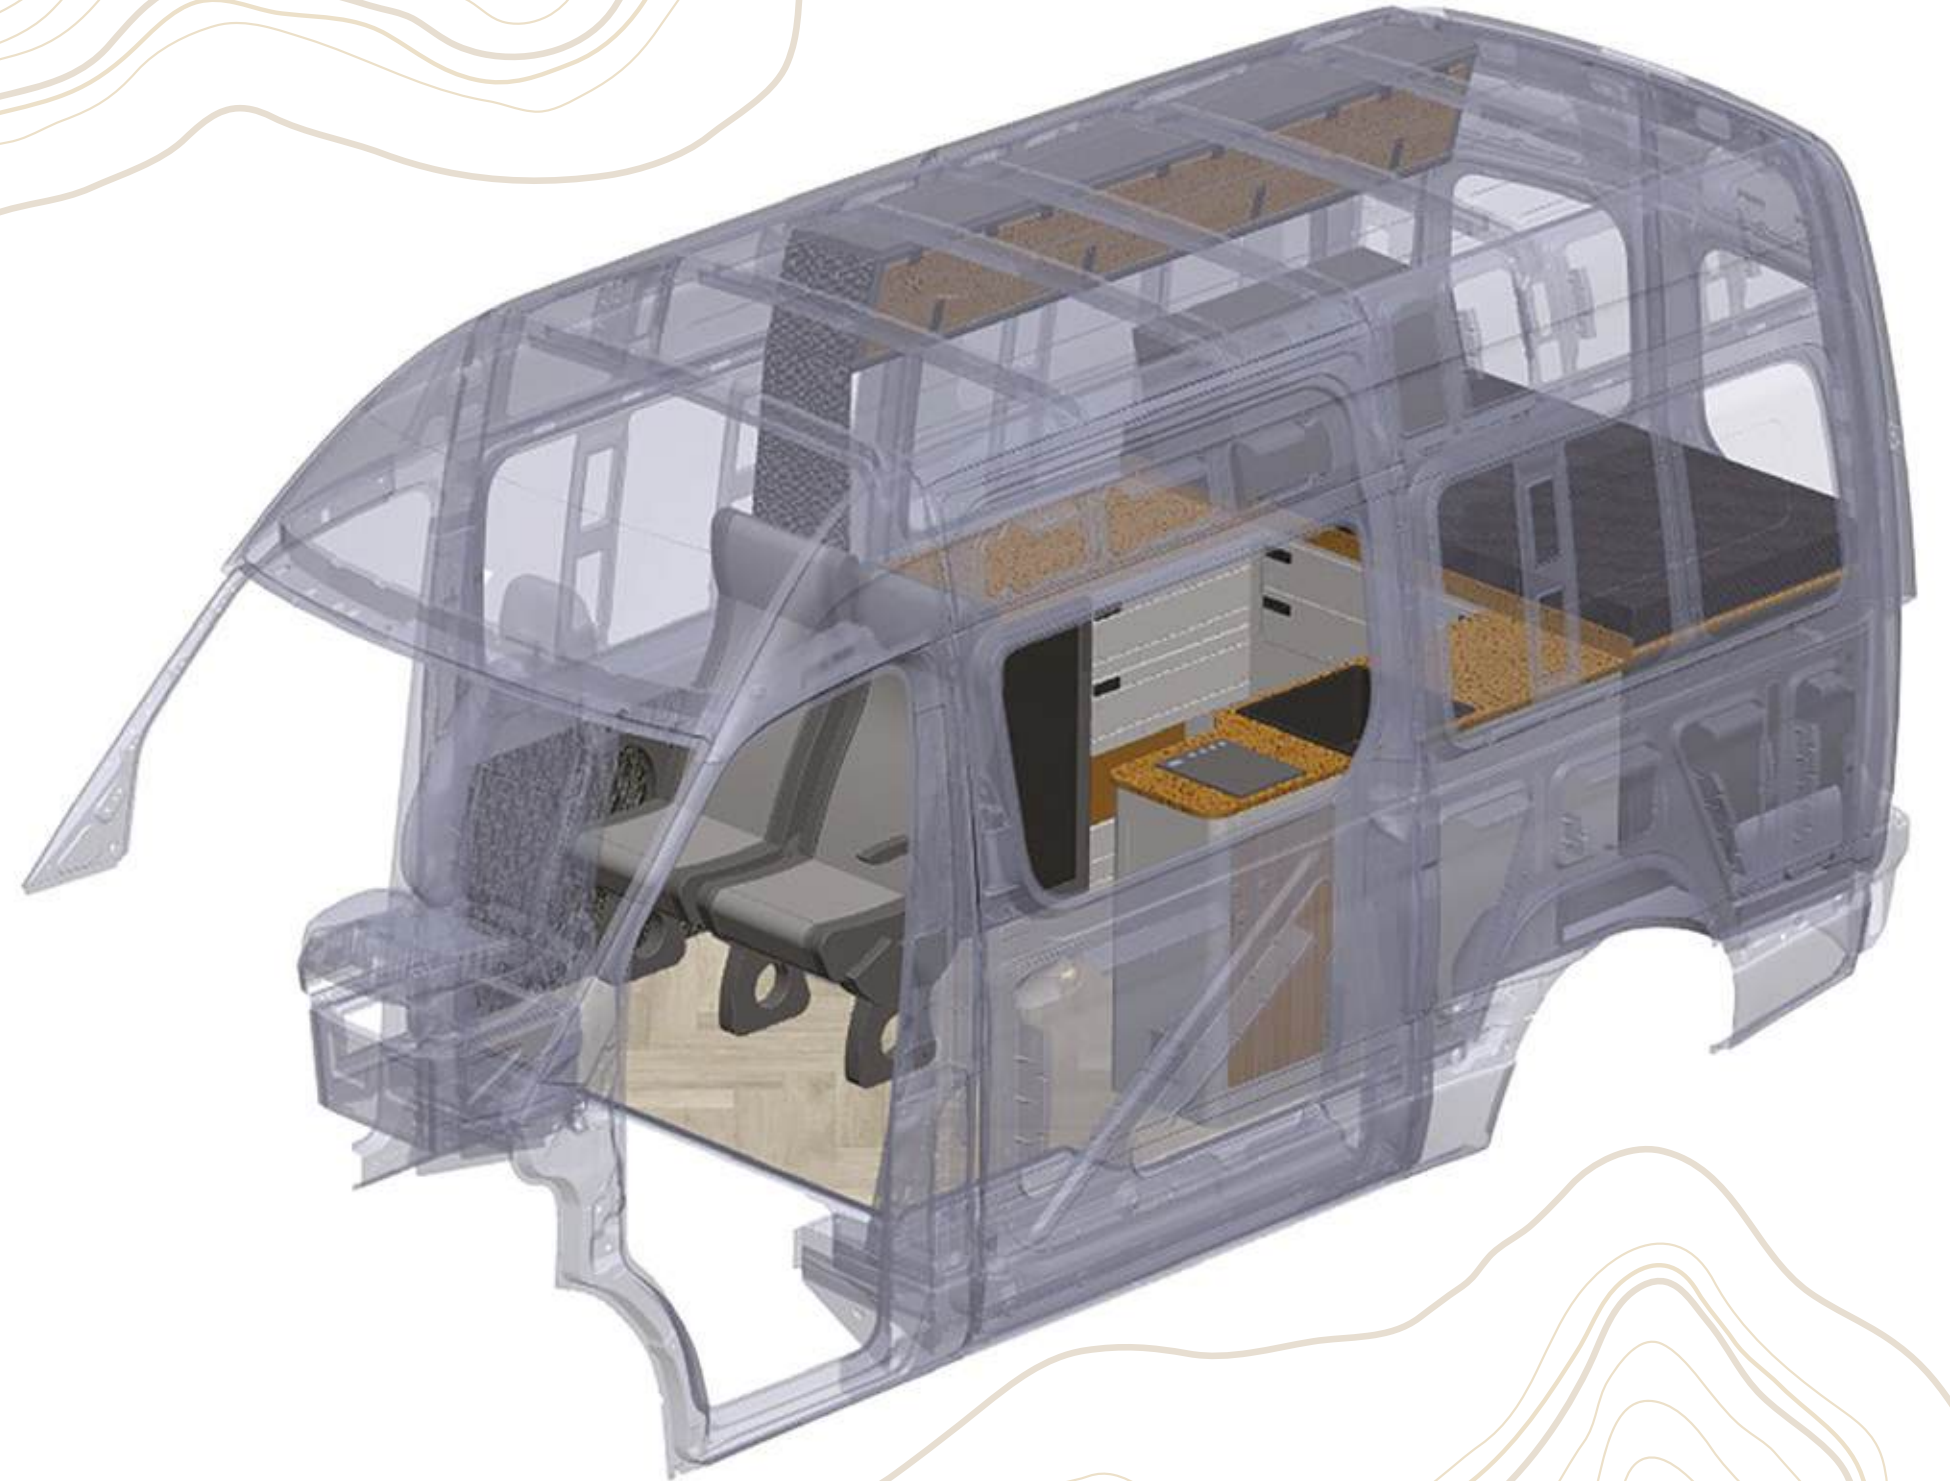

Reviewed In The Boardroom

BUILT ON THE BENCH. 330KG WEIGHT.

*Precision you can see.
Compliance you never have to think about.*

Every line is modelled, reviewed and proven before a single panel is touched. Every build is signed off to full GVM compliance.

THE BUILD

Not Defined By A Single Moment

Which is why this was never going to be an ordinary conversion.

Years in aerospace and engineering. A shared sense of adventure. A team that never stopped asking better questions. Not a single moment. A direction, followed long enough to arrive somewhere new.

Everything, In Writing

No guesswork. Nothing left for later.

A clean, confident reference table, organised by system:
Kitchen, Seating and Sleeping, Electrical, Water, Trim
and Finish, Lighting, Powerpoints, and Vehicle.

MERCEDES SPRINTER MASTER BUILD SPEC

GENERAL OVERVIEW		
Category	Feature / Material	Specifications
Weight	Total Built Weight	330 kg
Construction	Primary Structure	Aluminium Construction
Finishes	Countertops / Surfaces	Wood Finish (or alternative)

THE TESTIMONIAL

Earle and Henriette van der Watt, Somerset West.

After falling in love with RV life in America, we dreamed of having our own here in SA. Stephan made it happen! He built us a RV that is truly tough enough for Africa, but feels like a luxury cabin inside. The wood floors, brilliant layout, and stunning finishes show incredible attention to detail. It handles beautifully on every road trip we take. We are absolutely thrilled!
